

## CERTIFIED CATHODIC PROTECTION

Industrial  
piping

Multitechnical  
maintenance

Buildings  
efficiency

Metals that are not properly protected will rust. The corrosion of metal components can lead to numerous negative consequences for your installations: leaks, breakdowns, even safety issues. With professional preventive corrosion protection, your installation will last longer and repair and replacement costs will be kept under control.

### DON'T GIVE CORROSION A CHANCE - WITH EQUANS!

Equans takes the fight against corrosion off your hands. We carefully analyse your situation and needs, and offer you appropriate anti-corrosion solutions. In doing so, we take into account your budget, your in-house expertise and your objectives in terms of the integrity of your installations.

#### Our certified experts can help you with:

- a detailed analysis of your needs and risks;
- advice tailored to your installation and environmental factors;
- a design and calculation for low-maintenance corrosion protection, for example, passive or active cathodic protection;
- a choice of high-quality protective material;
- installation and inspection by NACE corrosion engineers;
- monitoring and maintenance, or training of your maintenance technicians.

**This means you can extend the life of your equipment and avoid unnecessary servicing costs.**

## QUALITY PRODUCTS

We work with various suppliers to provide the corrosion protection on offer. This enables us to deliver a complete range of A-grade products, for both passive and active cathodic protection, and for mechanical corrosion protection.

### Passive cathodic protection

- Sacrificial anodes
- Insulating joints
- Insulation kits for flanges

### Active cathodic protection

- Assembled systems
- Separate installation materials (e.g. measuring poles, rectifiers, current suppression anodes, reference electrodes, etc.)

## 5 GOOD REASONS TO WORK WITH EQUANS

### Leader in industrial installations and the energy transition

Equans is firmly committed to sustainable development. Not only do we make your installations more efficient, we also extend their lifespan through services such as corrosion protection, modernisation (retrofitting) and refurbishment.

### For all budgets

We use our creativity to make the most of your pre-determined budget, with complete transparency.

### A reliable and experienced partner

Over the years, we've developed an integrated approach to industrial installations. Thanks to our technical expertise, you can optimise the performance and longevity of your installations.

### Certified processes

We work in accordance with the ISO 9001 quality standard and VCA regulations. Our corrosion experts are NACE-certified, the best guarantee that our work meets international standards.

### A single point of contact

In addition to our expertise in anti-corrosion techniques, Equans has many other technical skills. Equans offers integrated solutions for virtually all your technical installations.

## Contact us

Don't let corrosion eat into your profit margins. Contact Equans today to explore the corrosion protection options for your facilities.
